

Dear Hiring Manager,

I am a junior frontend-focused developer transitioning into IT, with practical experience in HTML, CSS, JavaScript, React, and Node.js. I currently work remotely from Ukraine for a Prague-based property sublease company, managing customer service operations, workflows, and data processes. This role strengthened my analytical thinking, responsibility, and communication skills. I am highly motivated to grow as a frontend or junior full-stack developer and contribute to your team while continuously learning and improving.
